

# Practical-11

**Date:**\_\_\_\_\_

**AIM:** Write a PL/SQL block to accept the id of an employee (emp2 table) from the user and fetch a record of that employee. Check the salary and update the salary Column as follows:

- If salary > 10000 and salary <= 20000, then salary = salary + 30% of salary.
- If salary > 20000 and salary <= 30000, then salary = salary + 40% of salary.
